100-10461-6464

I do not recall any FBIHQ record duplicating this one from Dallas:

Dallas FBI took pictures of the scene of the crime, from which a shot might have been fired or where a bullet later was reported to have been found, "the railroad area." Of this "SHANEYFELT stated he does not want these photos in the Bureau."

The [redacted] field offices are the memory holes.

This record does [redacted] establish by another means that FBIHQ knew the Dallas office held information not at FBIHQ.
